LIFE SCAN
VULNERABILITY MANAGEMENT SERVICES

LifeTech's Life Scan — a Vulnerability Management Services solution — detects vulnerabilities across network devices, servers, web applications and databases to help you reduce risk and better manage compliance requirements. We provide services on advanced scanning capabilities to detect and prioritize hidden risks on your public-facing and internal network infrastructure. Simplified workflow automation and unique reporting capabilities help speed vulnerability identification and remediation. Our solution is cloud-based so you can save on licensing fees and security operations maintenance costs.

Through Life Scan, your organization can achieve improved time to value by leveraging an on-demand cloud-based platform, removing the need to purchase dedicated scanning applications. This achieves a more efficient end-to-end process for remediating vulnerabilities, and better tracking for compliance purposes as well as a streamlined Security-as-a-Service (SaaS) delivery model.

LIFE SCAN
VULNERABILITY MANAGEMENT SERVICES

LIFE SCAN FEATURES

Vulnerability Management	Via agent-less scanning from both inside and outside the firewall, to detect vulnerabilities in customer's security and networking posture
Remediation Guidance	Workflow to help fix vulnerabilities quickly and easily through the information provided in monthly remediation reports
Database Vulnerability Detection	Help identify vulnerabilities in common databases and database configurations to ensure the customer's databases are properly postured in security
Web Vulnerability Detection	Help identify threats such as SQL injections, cross site scripting and other high risk vulnerabilities in web applications of the customer
Intelligent Scanning	Deliver accurate scan results in less time with a system that follows an assessment process similar to that used by ethical hackers, with fewer false positives

LIFE SCAN VALUE PROPOSITON

- Improved time to value - leveraging an on-demand cloud based platform vs. cumbersome customer provided equipment (CPE) deployment options

- Minimized time and effort - automation and a single solution to cover the broadest set of vulnerabilities

- Improved accuracy of investigations and reduced mitigation time

- Hierarchical access and views let managers distribute the workload of vulnerability management throughout the organization

- Satisfy internal and external scanning requirements

- PCI Compliant Scanning

LIFE SCAN PACKAGES

	STANDARD	PREMIUM
Agentless-scanning	●	●
Internal and external scanning	●	●
Web Application, Infra and DB Scanning	●	●
Remediation guidance	●	●
Scanning frequency: 1 time scanning	●	●
Unlimited scanning for dedicated IP range	●	●
On-site review discussion	●	●
Monthly policy change requests (2 x 12 hours, 2 x 24 hours)		●
Monthly on-site operational review discussion		●
