

LIFE VAULT

HOSTED EMAIL AND WEB SECURITY SERVICES

A growing range of sophisticated and converging threats aim to compromise communications and steal confidential data. Viruses, spam and spyware are just some of the profit-reducing, brand damaging weapons being directed at enterprises. LifeTech's Life Vault — a Hosted Email and Web Security Services solution — is designed to combat these threats via a comprehensive cloud-based offering with no technology acquisitions or deployment. Life Vault's hosted email security services is designed to strengthen and simplify clients' security stances. It helps clients mitigate security risks by scanning and quarantining threatening emails before they reach and harm the network. Meanwhile, Life Vault's web security is designed to help protect IT investments and productivity by reducing the threat of spyware and viruses delivered via web browsing. This is achieved by effectively enforcing corporate Internet usage policies by filtering access to inappropriate or potentially dangerous URLs.

LIFE VAULT

HOSTED EMAIL AND WEB SECURITY SERVICES

LIFE VAULT FEATURES

Anti-Virus	Anti-virus protection scans emails and attachments for malicious content by leveraging multiple commercial scanning engines for superior accuracy and performance.
Anti-Spam	Anti-spam protection scans inbound emails for time wasting content and deletes or quarantines the content based on user definable policies. Leverages multiple engines.
Image Control	Analyses email messages for images and reviews against a user definable policy and keeps unwanted content out of your organization.
Content Control	Allows for analysis of email content and enables user definable control over file attachment types, email text content and more.

LIFE VAULT VALUE PROPOSITION

- Helps block inbound and outbound email containing viruses, worms, spam and other malware.
- Delivers email security in-the-cloud to avoid additional hardware or software costs.
- Helps enforce Internet usage policies by blocking access to inappropriate websites.
- Blocks spyware and viruses before impact.
- Stops confidential information from leaving your company.
