## MANAGED SECURITY INFORMATION AND EVENT MANAGEMENT

Organizations today face a host of new challenges that drive them to deploy various technologies to help manage constantly evolving security threats and regulatory compliance requirements. They are looking for an end-to-end solution that can help them plan, design, build, or transit their existing security information and event management (SIEM) investment for an effective managed security solution.

LifeTech's Life Radar — a Managed Security Information and Event Management service — is designed to provide 24/7 expert monitoring and response for the most complex and challenging environments. The solution offers real-time threat monitoring, escalation, incident reporting, and remediation assistance designed to stop and reduce the impact of security breaches any time and any place with added SIEM solution/device management.
