

# LIFE SHIELD

## INTELLIGENT LOG MANAGEMENT

LifeTech's Life Shield — an Intelligent Log Management solution — is a cloud-based log management service designed to provide clients with 24/7 monitoring and protection against threats while complying with regulations that require log monitoring. Powered by IBM QRadar technology, it uses hosted, multi-tenant technology to provide intelligent log management capabilities. It can provide your organization with a single view of the security posture with flexible service options to consume the right amount of service for the right devices and the ability to make changes when you want as your security capabilities mature.

Life Shield on cloud lets you “pay as you go” — with a reduced-cost operating expenditures (OpEx) model, virtually eliminating the need for hardware and other capital expenditures (CapEx) for log management. Charges are based on required events per second (EPS) and retention periods, with scale and deployment options designed to meet the needs of dynamic, hybrid IT environments.

# LIFE SHIELD

## INTELLIGENT LOG MANAGEMENT

### LIFE SHIELD FEATURES

- Automatic updates for changing compliance needs, with routine LifeTech updates on compliance dashboards and applications (ex. templates for PCI compliance)
- Policy management and alert monitoring, with a single pane-of-glass alert visibility, empowered by log query and analytics through correlations with IBM's Security QRadar platform
- Incident forensic and analytic capabilities, powered by X-Force threat analysis intelligence and supported by more than 6000 certified IBM professionals
- Analysts can run searches and correlate events in real time with pre-built searches on log and event data
- Easy and flexible procurement with entry level service at only 100 EPS
- Integrated front-end portal supports ease of use for log query and compliance reporting
- Robust log query search and report schedule interface
